Arron Philip

Computer Science Student | Aspiring Software Developer

Manchester, UK | arron5588@gmail.com | github.com/arronPhilip | linkedin.com/in/arron-phlilp

PROFILE

Third-year BSc (Hons) Computer Science student at Manchester Metropolitan University, expected to graduate in 2027. Interested in software development and building practical, user-focused applications. Brings experience from part-time administrative and warehouse-operations roles, alongside independent web and software projects. Outside of study, I enjoy sports and fitness.

EXPERIENCE

Administrative Assistant | Marie De Louise Solicitors

Part-time, remote | October 2024 – Present

- Provide remote administrative support to the solicitors' office.
- Assist with preparing wills and powers of attorney, and review legal documents.

Warehouse Associate | Amazon DSP, Rochdale

Part-time | October 2025 – Present

- Work across pick, stage, stow, induct, and receiving operations.
- Adapt between warehouse tasks and use problem-solving to address operational issues.

SELECTED PROJECTS

DocChat | Python, Flask, Gemini API, SQLite, Google OAuth, JavaScript

Built and deployed a full-stack AI document assistant: users upload PDFs or Word files and ask questions, with streamed answers that cite their sources, automatic document overviews, follow-up suggestions and one-click summaries. Added Google sign-in with server-side token verification and per-user private chats.

Live: docchat-006c.onrender.com | Source: github.com/arronPhilip/docchat

Lead Map | JavaScript, Leaflet, OpenStreetMap

Built a place-search and route-planning web app using an OpenStreetMap-powered map, with nearby-place discovery and directions.

Source: github.com/arronPhilip/lead-map

GymTrack | React, Vite, Node.js, Express, MongoDB

Developed a workout tracker for recording exercises, sets, reps, weights, and training progress.

Source: github.com/arronPhilip/gym-tracker

Maze Escape | JavaScript, HTML, CSS, breadth-first search

Created a browser maze game with randomly generated levels and an AI guard that follows a shortest path found using breadth-first search.

Play: arronPhilip.github.io/Maze_Escape

EDUCATION

BSc (Hons) Computer Science | Manchester Metropolitan University

Expected graduation: 2027

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C#, HTML, CSS

Tools & technologies: React, Vite, Node.js, Express, MongoDB, Flask, SQLite, Leaflet, Git, GitHub

Also: AI/LLM APIs (Gemini), Google OAuth, REST APIs, deployment on Render

Core strengths: Problem-solving, debugging, responsive web development
